

VARNIKA DUVVUR

ARCHITECTURAL DESIGNER | BIM + COMPUTATIONAL DESIGN

Newark, NJ | +1 (862) 372-3400 | varnikaduvvur1133@gmail.com

PORTFOLIO varnikaduvvur.github.io | **LINKEDIN** linkedin.com/in/varnika-duvvur

Recent NJIT Bachelor of Architecture graduate with experience producing construction drawings, parametric design systems, fabrication-ready components, and coordinated architectural documentation. Proficient in Revit, AutoCAD, Rhino, and Grasshopper, with field exposure to structural and MEP workflows.

TECHNICAL SKILLS

BIM & Documentation: Revit, AutoCAD, BIM 360, Bluebeam, floor plans, RCPs, sections, elevations, wall details, construction drawings

Computational Design & Visualization: Rhino, Grasshopper, SketchUp, Lumion, V-Ray, Stable Diffusion

Additional Tools: QGIS, Adobe Creative Suite, Microsoft Office Suite

Codes & Accessibility: Working knowledge of building codes, ADA standards, and accessibility requirements

Credentials & Training: Harvard Architecture, Canter CADD AutoCAD, Autodesk Revit, Rhino/Grasshopper, Lumion

Sustainability: Currently pursuing LEED Green Associate

Licensure: NCARB Record Established | Preparing to Begin AXP | Pursuing Architectural Licensure

Core Strengths: Detail-oriented documentation, cross-disciplinary communication, adaptability, and site exposure

PROFESSIONAL EXPERIENCE

Architectural Researcher & Archivist | Paul Rudolph Institute of Modern Architecture, Newark, NJ Jun 2025 - Present

- Digitize, catalogue, and preserve original blueprints, construction drawings, and photographs for the institute's permanent architectural collection.
- Maintain accurate document control, labeling, and accessibility standards applicable to BIM file management and CAD drawing coordination.

Architectural Intern | Peter Coffin Studio Sep 2025 - Dec 2025

- Developed a graded lattice pavilion using a Grasshopper circle-packing workflow responsive to curvature, scale, and human use.
- Translated complex parametric geometry into lightweight, fabrication-ready components while balancing structural integrity, permeability, and material efficiency.

Architectural Intern | Specialty Structures USA, Dubai, UAE Jun 2021 - Aug 2021

- Produced AutoCAD and Revit design documentation and supported multidisciplinary coordination across active structural and specialty projects.
- Observed structural assembly, MEP coordination, and construction sequencing during site visits to Last Exit, Green Planet, and Jumeirah Creek Hotel.

EDUCATION

Bachelor of Architecture | New Jersey Institute of Technology (NJIT), Newark, NJ May 2026

Relevant coursework: Building Technology, Mechanical & Environmental Systems, Construction Documentation, BIM Integration

Additional coursework: Structural Systems, Urban Design, Adaptive Reuse

SELECTED ACADEMIC PROJECTS

Terra Hotel | Manhattan: Developed a high-rise documentation package with seven floor plans, sections, elevations, curtain-wall assemblies, truss framing, and green-roof connection details.

Branch Brook Park Modern Art Gallery | Newark, NJ: Produced a coordinated CD set including plans, RCPs, building and wall sections, structural grid, circulation diagrams, and exterior elevations.

Liberty Rail Gardens | Liberty State Park, NJ: Designed an ecological civic pavilion supported by daylight simulations (UDI, sDA, ASE), environmental analysis, plans, and axonometric drawings.

Flexible Spaces | Sao Paulo Museum of Art: Proposed an adaptive-reuse system using modular folding walls, facade studies, exploded axonometrics, and full building sections.
